Industrial R&D in 2008. Charles F. Larson examines five scenarios for driving accelerating change over the next 10 years, and finds information technology and globalization the most prominent drivers.

Leading R&D: How Much Progress in 10 Years? Robert Szakonyi learns that while six R&D organizations have made significant progress in selecting and managing their projects, they are still finding it tough to gain support for their long-term R&D.

Measuring R&D Productivity. Mark G. Brown and Raynold A. Svenson, in their RTM Classic, explain why R&D measurement and evaluation systems fail, and what to do about it.

How Avery Dennison Manages Its Intellectual Assets. Paul B. Germeaad and Lorraine Morrison describe

seven tools for capturing, managing and identifying the firm's intellectual assets.

The Department of Energy Superconductivity Initiative. D. Bruce Merrifield and William M. Evan present a model of collaboration in which government is the catalyst and seed-funder for programs subsequently operated by the private sector.

Weaving Advanced Manufacturing Technology into the Fabric of the Business. John J. Kanet reports on how a small apparel manufacturer has made innovation and technology an integral part of its long-term business strategy.
